DIDSBURY, ALBERTA, THURSDAY, MAY 9, 1935

\$2.00 per year. 5 cents a copy.

Mountain View Council Meeting

The regular meeting of the Mountain View Council was held at Olds on Saturday, with Reeve Flinn in the chair and all councillors present.

A claim was presented for damages done to a car by a loose rock on the road east of Didsbury. The council decided not to allow the claim.

The secretary reported the notification of a number of certificates under the Dominion Debt Adjustment act which had been granted.

A grant was made towards the Jubilee celebration at Didsbury at which the children of the rural districts were to be entertained.

It was reported that an application for old age pension had been approved by the Department.

The new caterpillar tractor which had been delivered at Olds on Friday was inspected by the council. It was decided that work be commenced on the roads this week.

Present plans of the council are that about five miles of new road in each division be graded during the season.

It was decided to make a trial shipment of fuel oil from the Montana oil field. The oil will be hauled by truck from the refinery near Coutts. It is expected that approximately 3c per gallon can be saved.

A number of relief cases were discussed and the current accounts were passed for payment.

Geo. Palmer, Communist Candidate

The Red Deer constituency election conference of the Communist Party of Canada was held a few days ago, at which George Palmer, well-known organizer of farmers and workers in Alberta, was nominated as standardbearer of the Communist Party of Canada in the Red Deer constituency in the coming provincial election.—RED DEER ADVOCATE

Celebration Postponed.

The children, and older folk too, were much disappointed on awakening Monday morning to find that snow was falling very heavily and the prospect of holding a successful Silver Jubilee celebration was out of the question.

The committee got together early and it was decided that the day's proceedings would have to be postponed.

A decision was arrived at that the most appropriate day to hold the celebration would be the King's birthday, Monday, June 3rd, when a similar program to that arranged for the jubilee celebration will be carried out.

The postponement, however, had its compensation, as it allowed the people to listen to the wonderful radio program of the jubilee celebrations being observed throughout Canada and the Old Country.

Receive Jubilee Medals.

Two Didsbury citizens were honored by the King last week and were awarded Jubilee Medals for services rendered in the interests of the community.

Mr. W. A. Austin, who has been for many years a faithful worker with the Red Cross Society, and who is a member of the Alberta Council, received the award, as did Miss Parrot, Matron of the Didsbury Hospital.

Successful Jubilee Concert & Dance

There was a full attendance at the concert given by local artists in aid of the Jubilee Cancer Fund held Monday evening.

The concert was opened by the School Orchestra, and these young musicians delighted the audience with the numerous selections played. Together with their leader, Mr. C. R. Ford they are to be congratulated on the wonderful progress they have made during the past year.

Songs were rendered by Mrs. H. J. Wood, Alex Robertson and Jack Robertson, and vocal selections by the Westcott Quartette and the Edwards Trio.

Musical selections were given by the Boorman Family, Miss Evelyn Liesemer, Mrs. Bolton, the Misses Joyce and Vera Levagood, Mrs. Jack Pearson, and readings by Miss Weiss and Dave Jenkins.

The concert was thoroughly enjoyed and every item merited the applause it received.

Mayor Chambers occupied the chair and Dr. Clarke gave an instructive address on the causes and treatment of cancer.

After the concert a very successful dance was given, with the Halliday Orchestra supplying the music and Mr. George Julien as floor manager.

The financial results of the concert and dance were very gratifying and after paying expenses the Jubilee Cancer Fund benefited by the sum of \$60.00.

Dr. A. H. Mann, physician at Olds for twenty years, was last Thursday nominated as the Liberal candidate for the Olds provincial riding. J. P. Ferguson, the only other nominee, withdrew. Present M. L. A. for the constituency is the Hon. F. S. Grisdale, minister of agriculture.

Will Plant Trees.

The town has purchased 500 green ash trees to be planted in town and which are expected to be delivered about May 15.

The council has decided to sell a number of the trees to persons wishing to plant them in town. They will be sold at cost price which is 55c each.

Anyone wishing trees should order immediately.

Organize Neapolis Mutual Telephone Co.

The Neapolis Mutual Telephone Company was organized at a meeting held Saturday evening in the Lone Pine Hall. The company will comprise subscribers on rural lines 5, 7, 14, 21, and 36 subscribers have already been signed up.

Mr. George Burns was elected president, Mr. Hugh McLean vice-president and Mr. W. Aussenhus secretary-treasurer. The directors are W. Archer, Jake Brown and Aussenhus.

With the organization of this company, which will be effective as from May 1st, all rural telephone lines tributary to Didsbury have been taken over by mutual companies.

Greetings Acknowledged.

A telegram was received Monday from the secretary of the governor-general at Ottawa thanking the Mons Chapter, I.O.D.E. and the Didsbury branch of the Canadian Legion for the loyal message forwarded by these organizations to the King on the occasion of his silver jubilee.

The telegram reads as follows: The Governor-General is commanded by the King to express to all members of your association His Majesty's very sincere appreciation of their loyal message.

SECRETARY GOVERNOR-GENERAL

"Y" Notes.

The "Y" Girls will meet at the home of Mrs. H. J. Wood on Tuesday evening at 7:30. All members and friends welcome.

Westerdale M.D. Sets Mill Rate

The mill rate for municipal purposes was set at 9 mills at the regular meeting of the Westerdale council held at the municipal office in Didsbury last Saturday. This is an increase of two mills over last year, but the municipal taxes will be practically the same as last year on account of the reduction of the assessment. There will be a saving, however, on supplementary revenue taxes.

A grant was made to the celebration of the King's Silver Jubilee at Didsbury.

Roadwork for the season came up for discussion and engineers' plans were presented for the straightening of the roads and improving the grades at the Rosebud and Dog Pound coulees on the blind line. It was arranged to make the annual inspection of roads during the last week in May.

Matters of relief and the payment of accounts comprised the balance of business transacted.

Social Credit Convention.

The Social Credit convention for the Didsbury constituency was held at Acme on Saturday with a good representation of delegates.

The four possible candidates selected by the convention were E. P. Foster of Three Hills, H. Hammell, Carstairs, E. P. Kirk, Three Hills and H. F. Pryor, Sunnyslope.

The names of these possible candidates were brought before the Social Credit advisory board at Calgary on Monday, but the name of the candidate chosen will not be made public until the election writs are issued.

Evangelical Church Notes

At the morning service Sunday the Pastor's sermon will be entitled "Woman's Ministry." In the evening Miss G. S. Eby will bring a message of special interest to the ladies.

This Sunday will be observed as "Mother's Day." Both services will be in honor of "Our Mothers." Pay your respects to your mothers by attending church with her if that is at all possible, and by attending in her memory if it is not possible to have her with you.

O mother, when I think of thee
'Tis but a step to Calvary.
Thy gentle hand upon my brow
Is leading me to Jesus now.

WEEKLY JOKE

Salesgirl: "Here is a useful household article, sir—a neat little breakfast gong."

Male Shopper: "Don't need any breakfast gong at our home, I can hear my wife scraping the toast."

A. Sheline Chosen Liberal Candidate

Mr. Andy Sheline of Three Hills was unanimous choice as Liberal candidate for the Didsbury constituency at the Provincial election to be held this summer, at a well attended convention held at Acme last Friday.

Mr. Sheline is an oldtimer in the constituency, coming to Didsbury in 1906. He moved to Three Hills when that town was first founded and has been in business there for twenty-four years. For ten years he served as mayor of the town.

Mr. Sheline said that the principal motive in accepting the nomination was that of giving service to the people of the constituency, where he had lived throughout his manhood, and where all that he had ever gained had been made.

W. R. Howson, K.C.M.L.A., leader of the provincial Liberal party, gave an outline of the work of the party throughout the province and stated that before the end of the month Liberal candidates would have been nominated in every constituency in the province.

Mr. Walrod, federal candidate for Bow Valley, and Mr. McArthur, of the Calgary Young Liberals' Club, also spoke.

E. E. Keim of Acme was chairman of the meeting and Mac Purvis of Acme was elected secretary of the Association.

Grading Red Spring Wheat.

The definition for No. 2 Manitoba Northern Red Spring Wheat as given in Schedule 1 to the Canada Grain Act, 1930, having been amended in 1934 to be effective August 1st 1935, on and after that date the varieties of Red Spring Wheat eligible to be graded in the different statutory grades of Red Spring Wheat will be as follows:

No. 1 Manitoba Hard
No. 1 Northern, No. 2 Northern
Definition: Marquis or equal to Marquis.

Varieties Eligible: Marquis, Reward, Ceres, Pioneer, Red Fife, Renfrew, Red Bobs 222, Supreme, Early Red Fife, Ruby, Early Triumph.

No. 3 Northern
Definition: Red Spring Wheat of fair milling quality.

Varieties Eligible: Kota, Kitchenier, Preston, Huron, Stanley, Marquillo, Parker's Selection, Brownhead, Percy.

No. 4 Northern
Definition: Red Spring Wheat. Varieties Eligible: Early Prolific, Vermilion, Ladoga.

NOTE—Garnet Wheat excluded from the special grades established for this variety on account of admixtures of other varieties of Red Spring Wheat, may be graded as No. 3 Manitoba Northern.

'SALADA' TEA

Canada's Greatest Problem

The Canadian people are confronted with a gigantic problem. We say the Canadian people advisedly because, while governments, Federal, Provincial and Municipal are all struggling with it, the problem is one towards the solution of which individual citizens must make their contribution. The fact that it is a problem facing all other nations offers no consolation because the more acute and difficult it is in other lands only serves to make it more difficult in Canada.

The problem can be stated in two or three words,—unemployment and relief.

The unemployed man or woman wants work and the wages which work will bring to them. Failing work and wages, they must be provided by Governments with the necessities of life,—food, clothing, fuel and shelter.

Such necessities can, of course, only be provided by the State through the taxation of those other men and women who are employed, or still have some savings accumulated throughout the years of the past in order to make provision for their own future and old age. The only other way is for Governments to borrow money and add such borrowings to their public debts upon which interest must be paid through increased taxation, and the principal sum of which is passed on as a liability for future generations to meet.

So far as municipalities, with their small and limited sources of revenue, are concerned, many have reached the limit of what their taxpayers are able to pay in order to care for those who are unemployed. Further taxation simply means that more people will be unable to pay it, and, failing to do so, will lose what they still have and will, in turn, be forced "on relief". Faced with this situation, a largely attended conference of the mayors of the leading cities and towns of Canada unanimously declared the inability of the municipalities to any longer carry their share of the relief burden and called upon the Federal Government to assume it in its entirety.

On their part, the Provinces,—and more particularly the Western Provinces, which, in addition to the general and world-wide economic depression, have suffered more severely than other portions of the Dominion because of successive years of crop failures owing to the unprecedented drought conditions which have prevailed,—now find it impossible to raise, either by taxation or borrowings, the Provincial share of relief expenditures and at the same time assume the share of the municipalities.

It must be recognized, therefore,—the truth cannot be ignored,—that the problem is a national one, and one that most intimately concerns every Canadian citizen and every Canadian interest. This must now be accepted as a fact even though under the constitution of this country the responsibility of making provision for people in need is primarily a municipal responsibility. That is, the actual facts of the situation override all constitutional aspects.

Then, there is the other side of the picture. Tens of thousands of people who are "on relief" complain that the amounts allotted to them are inadequate to their needs and desires. They are insistent in their demands that relief allowances be substantially increased. They are organizing to enforce their demands, and all over the country communistic agitators are playing upon their distress and worries and arousing their passions and making demands which it is manifestly impossible for the remainder of the people to satisfy.

These agitators all loudly object to people on relief being asked to render any service whatever in return for the payments being regularly made to them. They insist that no person should be called upon by the municipality in which they reside to perform any work in return for the assistance extended to them. They refuse to recognize that, in effect, people are being paid what is tantamount to wages in advance, small though they may be, by their other fellow citizens, and they declare that to ask relief recipients to render any service in return for such assistance is to make "slaves" of them.

Yet Canadians worthy of the name, and knowing their country's difficulties, should be grateful for what is being done in their behalf, and if there is any manhood left in them they should not only be ready and willing, but actually anxious, to make what return they can to their fellow citizens and their country. These agitators demand work,—not for themselves but for those they would make their dupes,—and when work in its usually accepted meaning cannot be provided but State assistance is extended, they then advocate refusal to work in exchange for such assistance, or even for a small fraction of it. Why? Because they are out to destroy the very institutions of government and the very people who are now providing the unemployed with the necessities of life.

Such is the major Canadian problem of to-day. It is one, let it be repeated and emphasized, that vitally affects every citizen. It is their problem; what are they going to do about it?

We submit that the citizen who is employed, or has an income, or some reserves, should pay his taxes uncomplainingly, willingly and promptly and thus assist his country in a time of great difficulty. More, he should make every effort to provide a little work, no matter how small or temporary the job may be, for some one out of work, and thus relieve the pressure.

We submit further that all persons on relief should be reasonable in their demands, should endeavor to get along with as little as possible, rather than demand more. And they should show their manhood and self-respect by willingly, and at all times, rendering such service in return to their fellow citizens as it may be in their power to render.

This is no time to "rock the boat," and any person who seeks to do so is not a true Canadian, but has an ulterior motive to serve, and may well be described as an enemy of the country.

Are you tired, run-down, irritable? Constipation steals your energy!

Thousands of sufferers from constipation have captured new health and vitality with Quaker Bran . . . a pleasant, natural corrector for constipation.

Gentle, safe and effective . . . It stimulates sluggish intestinal muscles . . . produces regular healthy bowel movement. Eat Quaker Natural Bran with your regular cereal or in delicious muffins and cookies.

A booklet of easy recipes is in every package.

Remember, Quaker Bran is different from all prepared bran cereals. It is pure bran, uncooked—untreated—unadulterated. For these reasons it is definitely richer in mineral and vitamin content.

QUAKER BRAN

Pure, Natural, packaged bran.

To Abolish Noise

"Silent" House Will Be Shown At London Exhibition

London is to have a "house of hush", a house so quiet that in it a person may be able to hear the proverbial pin drop. There is to be a "silence" exhibition in June at which it will be possible to see—but not to hear—the following:

A silent house, with silent lift and silent locks; sound-proof ventilating windows; sound-proof doors; silenced motorcycles; a noiseless motorcar; silent vacuum cleaners; silent road drills; a silent factory room.

The exhibition, at the Science Museum, South Kensington, will be organized by the Anti-Noise League, of which Lord Horder is president.

HER ARMS AND LEGS IMMOVABLE

Ten Years With Rheumatism

To this woman it must have been like commencing to live a new life, when she began to use her arms and legs again, after they had been helpless for ten years.

"I suffered with rheumatism," she writes, "and had been bedridden since 1920. I could not move arms or legs, and had to be fed like a child. Everybody thought I should be an invalid all my life. I forced myself to fight against it, and tried a number of different things. It was Kruschen that eventually saved me, and to-day I consider it is saving my life. My condition has greatly improved, and my limbs are gradually becoming more supple. Already I can eat without assistance, and dress myself—which I had not done for ten years."—M. H.

Two of the ingredients of Kruschen Salts are the most effectual solvents of uric acid known to medical science. They swiftly dull the sharp edges of the painful crystals, then convert them into a harmless solution. Other ingredients of these Salts have a stimulating effect upon the kidneys, and assist them to expel the dissolved uric acid needles through the natural channel.

Germany's Air Force

Hitler Reports It Is Numerically Stronger Than Britain's

The London Daily Mail said Adolf Hitler had informed Sir John Simon, British foreign secretary, that Germany already has an air force numerically stronger than Great Britain's.

The Daily Mail did not reveal the source of its information but it was known Simon returned from Berlin with documents presented to him by Hitler in which, it is understood, Der Fuehrer frankly revealed the extent of Germany's armaments in the air.

The disclosure of Germany's air strength was reported to have caused grave concern to the British cabinet. Ministers held several informal meetings for a preliminary discussion on what is expected to be "a showdown" debate on the entire German situation when Capt. Anthony Eden, lord privy seal, returns from a swing through European capitals.

Error In Scottish Notes

Many Million Have To Be Withdrawn From Circulation

Following the detection of an error which had existed in the design in Scottish bank notes for many years, millions of them will be withdrawn from circulation. The Bank of Scotland, the National Bank of Scotland, and the British Linen Bank have been using the royal arms in the design of their notes. The royal arms are the ensigns of public authority, and can only be used by the King or government officials. It was only recently, when a question was raised as to why the Bank of England did not use one or other of the royal arms, that their use on the Scottish notes was challenged. Francis J. Grant, the Lyon King-of-Arms, who investigated the matter, found that the officials were unaware of the regulation.

Irish Goat For Gotham

During the year 1934 the United States purchased an animal from the Irish Free State. This is solemnly recorded in the shipment returns as "Cork to New York—one goat."

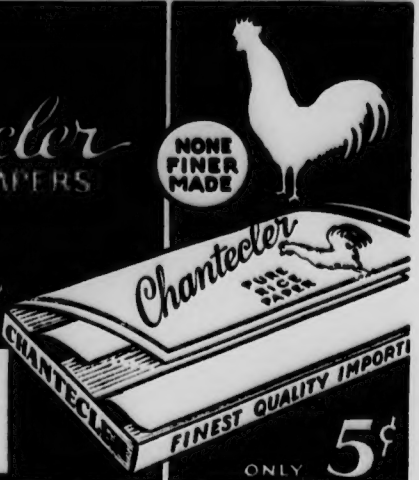

Nearly one-fourth of Holland is below sea-level. 2093.

Long Distance Record

Telephone Call From Liner Covered Distance Of 17,887 Miles

Sir Julian Cahn, noted British cricket captain who took a British eleven to the United States and Canada 18 months ago, holds the world's record for long distance telephoning. Sir Julian's record, said wireless telephone operators of the Canadian Pacific liner Empress of Britain when the world cruise ship arrived at Hong Kong recently, was made two weeks before when the ship was at sea between Singapore, Straits Settlements, and Bangkok.

Atmospherics prevented the reception of a call from the Empress of Britain to Nottingham, England, by the London receiving terminal. But the call was successfully completed by routing it direct from the ship to San Francisco, overland from there to New York, and by beam wireless to England.

At the time Sir Julian talked he was seven hours ahead of London time. The San Francisco control station was nine hours behind London and New York, of course, three hours ahead of the Pacific station. Rough computation shows a distance of 17,887 miles for the conversation between the Empress of Britain and London off which 9,275 miles was a direct connection between the ship and San Francisco. Direct, the voice would have travelled only 7,950 miles.

Records Made Years Ago

Carry Voice Of Jenny Lind But Cannot Be Found

Somewhere in Sweden or Denmark the "voice" of Jenny Lind, the Swedish nightingale is believed to lie forgotten. Possibly it is in an attic or a storehouse. The famous singer, it has been revealed, made records in Paris in 1887, shortly after the first phonograph was put on the market. The records were of the old cylinder type. After Jenny Lind's death, it is believed, they were sent either to Stockholm or Copenhagen. A Swedish newspaper is appealing to its readers to search their attics, old trunks and boxes in case they may possess the precious records without knowing it.

Holland's Noord Zee Canal has navigation locks bigger even than those of the Panama Canal.

Gift For King George

Ruler Of Tonga Gives Ancient Turtle With History

King George is to be presented a three-hundred-year-old turtle with a history when Queen Salote, the six-foot-three ruler of Tonga, arrives in London. She is now on her way with her son, who attends an English school. In 1774 Captain Cook, famous British navigator, made a forced landing, owing to shortage of provisions, at the Pacific Islands of Tonga. His reception, to his surprise, was so warm that he renamed them the Friendly Islands, the name by which they have been known ever since. Captain Cook had a turtle, then 160 years old, on board, intended as a present for George III. He gave it as a peace offering to King Tubou, of Tonga. Queen Salote, his descendant, inherited the turtle.

Boy Seems Unlucky

Thinks Eleven Accidents In Nine Years Too Many

Nine-year-old Victor Holmes of Pendlebury, Scotland, thinks 11 accidents in nine years too many. He is recovering from No. 11, which was upsetting boiling water on his legs. Victor has been saved from drowning three times, has been bitten by a dog, burned by blazing carbide, and has dislocated his elbow and become entangled in the spokes of a cart wheel.

ARE YOU WEAK?

Delving Into The Past To Piece Together The Story Of The Lost People Of England

Little by little, the patient toil of the archaeologist is piecing together the strange story of the lost peoples of England. How they lived and worked; their dwellings; the gods they worshipped in those far off days when Rome was young—slowly, these things are again emerging into the light.

Yet it is a story with many missing chapters still. Here and there, hard by some mysterious monolith or earthwork, excavations reveal concrete evidence of a civilization that grew and died centuries before recorded history. But who the peoples were, how and why they disappeared, no man can say with any certainty.

Almost half-way in the train journey between Plymouth and London, the Canadian visitor will note hillsides scarred with what appear to be the irregular lines of old entrenchments. Round the hills they run, interconnecting in obvious design. Occasionally, earthworks rise above plain and rising land. Stone circles add their touch of mystery. They are part of a great system linked by green roads which traversed England from sea to sea long before Britain heard the tramp of Roman legions or the first Celt crossed the narrow sea from Gaul.

Who dwelt there and why were these great earthworks needed? The usual explanation is that they were built for defence. But defence against whom? The earthworks at Maiden Castle in Dorset cover five miles. What peoples in those dim days could have needed such elaborate defence? What peoples were so numerous as to hope to carry them by assault?

Dr. R. E. M. Wheeler, who has been conducting excavations at Maiden Castle, says that the multiple defences there imply a large population. In one pit, more than 4,000 sling stones were found. There were loom weights cut from chalk, innumerable bone arrowheads, even a piece of carbonized wheat bread.

Who were these people who came and went and left no history?

Archaeology has many theories but so far no concrete fact.

They are the lost peoples of England.

Depends Largely On Health

No Hard And Fast Rule For Reaching Century Mark

These centenarians get more confusing every day.

A woman in Mitchell, Ontario, who is 101 rises at half past four every morning and attributes her long life to early rising.

No doubt she goes to bed early and has her eight hours, but what's the use of living to 100 if one goes to bed early in the evening and gets up in the middle of the night?

Another centenarian will say that the secret of long life is to not get up early.

One will say that long life is only attained by total abstinence and no smoking. Yet there are plenty of centenarians who will claim that a "nightcap" and plenty of good tobacco keep them in perfect health.

So there can be no hard and fast rule for reaching the 100th year. What suits one person does not suit another. If total abstinence from alcohol and tobacco are the secrets, then there are thousands of people in Ontario who ought to live to 100 but won't.

Largely it depends primarily on a sound constitution, moderation in eating and drinking, plenty of fresh air and exercise—and freedom from organic ailments and worry.—St. Thomas Times-Journal.

Valuable To Gardeners

An ordinary toad, fully matured and sound in wind and limb, is worth twenty dollars to a gardener, according to Prof. A. F. Coventry of the University of Toronto. He does not guarantee that such a price can be obtained, but gives the assurance that every toad has a value not always recognized as an insect destroyer.

Made Aviation History

'Plane That Once Commanded Headlines Now Carrying Fish

Lazily winging its way, a huge aeroplane of the monoplane type, may be seen daily plying a scheduled fish run between Cheecham, Alberta, 200 miles north of Edmonton, and the numerous lakes in the northland. Once it commanded newspaper headlines and played a part in making aviation history.

With Bernt Balchen and Floyd Bennett at the controls, the big ship, in 1928, rescued Baron Gunther von Huenfeld, Captain James Fitzmaurice and Captain Hermann Koehl, forced down on the first east-west trans-Atlantic flight, on lonely Greenly Island, off the rockbound coast of Labrador.

The crew of the Bremen hopped off from Ireland on April 12. Their gasoline supply became exhausted after a 2,125-mile flight across the ocean. Almost within flying reach of New York, their objective, they were forced to land. Balchen and Bennett, in response to an SOS, rescued them from the rocky island in the Straits of Belle Isle where they had smashed their aeroplane.

Later, the big monoplane carried the mother of Charles A. Lindbergh from Mexico City to New York when the flying colonel was engaged in a North and South American flight. For three years the big, all-metal ship loaded with sight-seers, was a familiar sight over Niagara Falls. To-day, it is relegated to the commonplace task of hauling fish to market from the lakes in Northern Alberta.

GARDENING

Gordon L. Smith

Shapes And Sizes

Annual flowers are classified under various heads in the seed catalogues. Attention must be paid, of course, to time of blooming and color. Height should also be noted as a medium sized plant hidden by some bushy stocks or tall Cosmos, will be "born to blush unseen". But these are only the most elemental points which every gardener of a few years experience now notes automatically. There are other and finer distinctions. Certain shades blend well together and often a whole bed will be selected with this blending in mind. Of course for this sort of thing, all the plants must bloom during the same period. Fragrance should be taken into account, as there are some spicy things like Evening Scented Stock, Nicotina, Mignonette, Sweet Sultan and Verbena, which while rather plain as plants, fill the whole garden with a delightful odor, more especially in the evening. In shaded quarters, tuberous rooted Begonias, Pansies, and wild flowers will do well. In fact, they prefer this location to any other. In partial shade, Clarkia, Annual Larkspur, Lupine, Nicotina, Phlox, and Verbena should be grown. On poor soil, Portulaca is a favorite as well as Alyssum, Sweet-scented Stocks, Linum, Calendulas, Calliopis, Sunflowers, Schizanthus, Salpiglossis, Marigolds, Petunias, and many others. These will also successfully resist dry weather. For cutting purposes, there is a long list to choose from but it should include Gypsophila (Baby's Breath) useful for making up bouquets. There are several hardy annuals which can be picked with long stems just before the bloom opens and dried for winter bouquets. These include the Straw Flower, Statice, Acroclium, Rhodanthus and others.

Fruit For The Garden

A summer apple like Yellow Transparent, Astrachan or Melba should be chosen for dessert purposes, or Duchess for cooking; for fall, Wealthy; for early winter the McIntosh or Delicious; and for late winter, the Northern Spy. In the Prairie Provinces or Northern Quebec and Ontario, there are some new hardy types as well as good crab-apples available. Among sweet cherries, Windsor, Bing and Tartarian are recommended, while Montmorency and Early Richmond are standards of the other type. Clapp's Favorite is one of the best pears, coming very early, while Bartlett is a good later sort. Plums are grown almost anywhere in Canada, as well as currants, raspberries, strawberries, blackberries, thimble berries, loganberries, and gooseberries. Grapes are fairly hardy, and among the best are the Lindley.

Red Clover Always Popular

Seed Supply Is Not As Large This Year

Red clover is always in popular demand in Canada and promises to be in more than average demand this spring owing to the unusual shortage and high price of alsike and timothy seed. According to the Seed Branch, Dominion Department of Agriculture the red clover seed supply is not as large as in most years. Last year's total production in Canada was about two and one-half million pounds, and with the half million pounds or so of imported English red clover seed there will be available for seeding in Canada this spring about three million pounds. The normal annual Canadian consumption is more than this being between four and five million pounds.

The continued low purchasing power of farmers will of course have an effect in reducing seed purchases, but the relatively low price for red clover seed, as compared with alsike and timothy, will probably increase the preference for red to the extent that the total supplies of red clover seed available will likely all be needed before the season is over.

Most of last year's red clover seed crop in Canada was grown in Eastern Ontario and Quebec, which is fortunate from the standpoint of seed hardness and purity. The greater part of this seed is now in the hands of the seed houses for resale, but considerable quantities are still held by the growers in the Plantagenet area in Eastern Ontario and in the Montreal district in Quebec.

Further information as to sources of supply may be obtained from the Seed Branch, Dominion Department of Agriculture, Ottawa.

Bees that cannot see the color red can, however, see color at the ultra-violet end of the spectrum invisible to man.

Precautionary Measures Needed In Selecting Field Crops To Be Grown In Dry Areas In West

Newspapers Widely Read

Have No Cause To Be Afraid Of Radio

We are getting to be unduly afraid of the radio. When a statesman with a cause or an axe goes on the air he modestly claims 20,000,000 listeners and upwards. The odd thing is that few rise to question his figures. Are there not 18,000,000 homes with radios in the country? Are there not 4.1 persons per family? Doesn't this make something like 75,000,000 listeners hanging on the orator's every word?

But no one really knows how many of the nation's radios are tuned in on this particular earthshaking event. We know the millions of radios that are not attuned; the dials turned to the dance music programs, the comedians, the face creams, the shaving soaps, the folksongs, the cigarettes, the rumbas. No doubt, when you have made all deductions, like an income-tax statement, there will still be an impressive remainder. A national figure over the radio may address perhaps five million listeners.

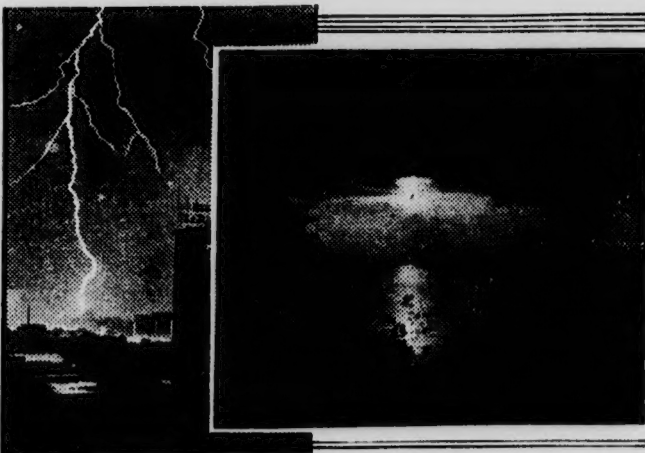

But his speech on the front page of the papers next day will have 35,000,000 readers.—New York Times.

Only One Allowed

There can be only one "Ataturk" in Turkey, and that is the Ghazi Mustapha Kemal. Thus reads the law which has just been passed by the Turkish parliament at Angora. All other persons are forbidden to use the name for it means "Father of the Turks" or "The Greatest Turk."

The SNAPSHOT GUILD

SPRING LIGHTNING

Lightning and moonlight pictures are unusual and fascinating and you can take them with any kind of a camera.

April showers not only bring May flowers but night-time electrical storms as well. And there's your chance for sensational lightning pictures.

With the dark, clouded skies the sharp ribbons of lightning spread in fantastic, fascinating flashes and when caught by the camera, the resulting picture is really something to talk about and adds variety and interest to your snapshot album.

There is no trick involved in taking lightning pictures. In fact, it's quite simple. If it is raining during the time the lightning is weaving its webs of flashes across the sky, and you don't want to get wet, take your pictures from the inside through an open window. Place the camera on a tripod or something solid at the open window and point it in the direction of the last few flashes. Set your shutter at "time", using the largest diaphragm opening or "stop." You may close the shutter after the first flash or leave it open for the registering of several flashes. Of course, if you leave the shutter open for many flashes, you will get a fantastic conglomeration of ribbons of light but not a true picture of a single flash. However, it will be unusual, to say the least, and well worth adding to your collection of "freaks."

If it is an honest-to-goodness storm, it will pay you in self satisfaction to take several pictures, for the more brilliant the flashes and the more ribbons of light zigzagging through the dark skies, the greater the chances for a really spectacular picture.

The only form of lightning that

does not register satisfactorily is sheet lightning. It merely uniformly illuminates a broad expanse of sky. With this kind of lightning, however, interesting silhouettes of trees and buildings can be secured.

And while discussing Dame Nature's "lighting plant," pictures by moonlight should not be overlooked.

Moonlight will serve to make pictures just as sunlight does, but as it is a great many times weaker than sunlight, exposures must be increased considerably. Perhaps the simplest way to calculate a moonlight exposure is to give 25 minutes for each 1:100 second exposure that would be given the same scene by sunlight.

For example, the exposure in bright sunlight for a landscape with a dark-toned object in the immediate foreground, would be 1/25 of a second with stop f.11 or U.S.S. Then the exposure by the light of a full moon would be 100 minutes with the same stop. This could be cut down to 50 minutes with stop f.8 or U.S.S. For a landscape without a dark-toned object in the immediate foreground about 25 minutes with f.8 or U.S.S. would be ample, and for distant landscapes the exposure can be from 10 to 15 minutes.

If a daylight effect is desired, the exposure must be multiplied by four, and this applies only to nights when the sky is clear and the moon is full.

With a single lens and all fixed focus cameras, use the largest stop and double the exposures given above.

So—let the sky light your way to out-of-the-ordinary pictures.

JOHN VAN GUILDER.

The scarcity of feed crops during the past season became more serious when it decreased the efficiency of farm horse power at the very time that power was urgently needed to enable return to more normal conditions.

Experiments and observations at the Dominion Experimental Station, Swift Current, Saskatchewan, indicate that precautionary measures in the future should include growing those crops which are now known to be more certain of production. Annual feed crops offer more security in most cases, when grown on summer-fallowed land.

Banner oats grown on summer-fallowed land at the Dominion Experimental Station, Swift Current, during the past thirteen years have never failed to produce reasonably good crops of fodder. Grasses and legumes have failed to provide stands in dry season. When established in a favourable location or in seasons of good rainfall, they have produced fair yields. Due to failures in dry seasons, grasses and legumes grown in definite rotations have produced 40 to 60 per cent. less fodder than oat hay grown on summer-fallow.

When grasses and legumes are to be grown, they should be sown on land that is likely to be favoured with more than the average amount of soil moisture, such as can be supplied by run-off water by natural or artificial means. Tests indicate that seeding may be done in early spring or in June, also in the late fall in some districts. At the same time consideration should be given to prevailing soil moisture and seasonal conditions. The seed should be sown shallowly on a firm, level seed-bed.

Annual fodders, such as cereal crops cut in the late milk or early dough stage, are more adaptable to dry farming conditions. The seeds are large and may be planted deeply and leave the soil in a lumpy condition to prevent soil drifting. Wheat is a valuable feed for all classes of livestock either as fodder or grain. Prolific spring rye, Banner oats and Colless barley are also good annual hay crops. When grain crops are sown in combination for hay purposes the yield and palatability are likely to be improved. Fall rye is very useful as an early maturing hay crop or as a supplementary pasture crop. Fall rye and Banner oats sown 35 pounds each per acre at any time from early spring to June 30, provide excellent annual pasture.—H. J. Kemp, Dominion Experimental Station, Swift Current, Sask.

Baking Monster Pie

Yorkshire Village Aims To Beat Two Former Records

Up in Denby Dale, in Yorkshire, England, they have, for the past two centuries, always baked a special, gigantic pie to mark an event of national rejoicing. And, this year, with the Royal Jubilee to be celebrated, they have decided to go the limit, and bake a pie bigger and better than has ever been baked before. Which means something, when two past records are considered. One pie, baked during the last century, took 31 horses to pull it on to the fair grounds where it was cut. Another pie, baked in 1928, was cut into 20,000 portions which were sold in aid of a hospital. Now, if this year's pie is going to beat all records, how many horses will be needed to pull it, and how many pieces will be cut from it?

New Signalling System

A new signalling system, with photo-electric "eye" apparatus and lookout screens for signal boxes, is being considered in London for the four main-line railways. Trains miles away will be made visible on the screens in thick fog or darkness, and signalmen will be able to "look in" at approaching traffic. All four main groups may be converted to the new system in three years.

The only substitute found so far for gasoline is shoe leather.

J. E. Gooder - Editor & Manager

"Kritiks' Korner."

The weather played a prank upon the kiddies celebration of the Kings Silver Jubilee. We are glad to learn that the sports will be held at a future date.

The artists who took part in the Bennett Concert are to be commended on their performance, especially the high school orchestra. Judging from the applause the Edwards Bros. were the most popular, but if we might venture a kindly suggestion, we wish they were provided themselves with some new music. Either the management of the Opera House, or the committee in charge, or both should have provided footlights for the stage so that the audience could have seen the artists faces.

We are impressed with the fact that we have an unusual amount of talent in this community. With a little less individualism and a little more co-operation there is no telling just how much might be accomplished. Would it not be a good advertisement for our town, if the merchants or board of trade, would select a number of our best artists and sponsor a Didsbury program over the Canadian Radio Commission network? We believe the Commission would be glad to co-operate providing a worthwhile program was offered.

Either many people in this town need to purchase a flag, for display on public holidays or else they need to make more use of the ones they already have. Taking the town as a whole the flag display on Monday last was very poor.

We have heard several complaints lately about cows and chickens running at large. With the time for gardening being at hand, owners of chickens and cows should see to it that they are kept on the premises.

OBSERVER

It is my observation that the rules of the curfew are not being enforced. Several small boys made so much disturbance at the windows of the basement of the school after the curfew had rung last Friday that it was difficult to understand the lecturer. How about enforcing the rules a bit around public places.

Taxpayer.

YOU will be MORE THAN SATISFIED by having your Watch, Clock, Phonograph, or Sewing Machine fixed right in Didsbury. All my work is guaranteed, Reasonable prices.

Menace of the House Fly.

Different times, different manners. In medieval times when the black death, typhus, smallpox, and other virulent plagues were taken as a matter of course the phrase "he would not kill a fly" was invented as a very high compliment to personal goodness. Today the person who would not kill a fly is looked upon merely as ignorant. The house fly is world-wide in distribution and is notorious for the part it plays in the dissemination of such dangerous diseases as typhoid, infantile diarrhoea, tuberculosis, cholera, dysentery and others. It breeds filth of the most objectionable kind, and yet it is tolerated in many homes and public eating-places. The fly is a menace to public health owing to its habit of passing directly from putrid filth to human food, carrying with it bacteria and other organisms and particles of decomposing organic matter on its hairy body, legs, sticky feet, and mouth-parts. Undesirable organisms may also be conveyed to food in its excrete and regurgitated saliva (fly-specks).

Several generations of house flies develop during the warm months of the year, says the Dominion entomologist, the number varying with the character of the season. The flies are most numerous in the summer and early autumn, but they diminish rapidly with the advent of cold weather. The most effective and desirable method of controlling house flies undoubtedly consists in eliminating or reducing their breeding places to a minimum by properly treating or disposing of such materials as manure and garbage. Fresh horse-manure is a prolific source of house fly production, and this material is probably responsible for the majority of flies in rural sections. In the cities, where horses have been largely replaced in favor of mechanical transport, garbage is an important factor in fly-production. To be effective, control measures directed against their breeding places should be organized on a community basis, supported by a public well-informed on the menace of the house fly to health and the means by which it may be combated. One neglected manure-heap or garbage dump is often sufficient to infest a whole neighborhood, and it is necessary therefore to enlist the active co-operation of the whole community.

RUGBY NOTES

The May meeting of the Rugby
Women's Institute was held at the
home of Mrs. Farrant with an
attendance of sixteen. After the
business of the day was concluded
Mrs. Hogg took the monthly talk on
the League of Nations. An excel-
lent paper on the "Causes Leading
to Mental Deficiency," prepared by
Mrs. O'Brien of Berwyn, was given
by Mrs. A. Wahl. A recitation,
"Driving an Auto," was given by
Miss Doreen Farrant. The meeting
closed with the National Anthem
and lunch was served. Next month's
meeting will be held at the home of
Mrs. Greig, and the topic for the
day will be "Canadianization."

Growing Caragana Hedges.

The desirability of growing wind-
breaks on Alberta farms, and the
suitability of caragana hedges for
this purpose, is generally agreed
upon.

To assist farmers in growing such
hedges the Lacombe Experimental
Farm announce they are prepared
to supply applicants with instruc-
tions for growing caragana and any
reasonable amount of seed, from
two pounds up, on payment of the
postage or express charges. Two
pounds of seed requires 15c postage
and will seed about 3,000 ft. of drill.

Caragana is extremely hardy, has
a very dense habit of growth and
can withstand long periods of
drought. It will grow to a height
of from 15 to 18 ft. A hedge 1-ft.
high will protect a field from the
wind for 50 ft., and a 15-ft. hedge
will give protection to 700 or 800 ft.

A Calf Club Idyll.

The value of farm club work in
improving the quality of livestock
and in stimulating a fondness for
farm animals, both in the young
club-members and in their parents,
is becoming more and more evident.
Hundreds of examples all over the
Dominion may be cited, but perhaps
one of the most idyllic stories of
farm homelife and the influence of
boys and girls farm clubs on it
comes from New Brunswick:

The beginning of 1929 found one
of New Brunswick's present leading
agriculturists just an ordinary farmer
milking two scrub cows. That
spring his two boys, Fred Jr. and
Ernest, joined the St. John Valley
Calf Club. Their father purchased
for each of the boys a purebred
Jersey calf and at the same time
bought a 4-year-old purebred cow
for himself. Recently young Fred's
original heifer and her daughter
each qualified in the R.O.P. tests
with silver medal records. Ernest's
heifer also made two good records.
Five cows in the stable have qualified
in the R.O.P. with 7 good records.
Today 16 to 18 purebred cows are
maintained, headed by one of the
best bulls in New Brunswick, "Park-
field's Sybil, 48611." A new barn
was built in 1934, and increased
crop production is likewise being
carried out with surprisingly good
results.

WORLD HAPPENINGS BRIEFLY TOLD

Last year the Canadian National Railways established 2,963 agricultural families on 335,126 acres of land the annual report of the system, tabled in the House of Commons, said.

Plans for a six-mile railroad tunnel under the channel between the Japanese mainland and Kyushu Island to cost \$5,400,000 are announced by the ministers of railways.

In an effort to unite all phases of the poultry industry, the Manitoba Poultry Federation has been formed at Winnipeg. Robert C. McGregor, Carman, Man., was elected president.

The British government has received a communication from the Canadian government raising further objection to the 1935 contract for sale of Russian timber in Britain, the House of Commons was informed.

Sir Edward Albert Sharpey-Schafer, inventor of the famed "Schafer method of artificial respiration," died March 30 in his Northumberland home. He was 85 years old.

Revision of the lists of electors throughout Canada will begin on May 15 next and end July 1. A proclamation by Col. John Thompson, Dominion franchise commissioner, published in the Canada Gazette, fixes these dates.

The first three months of 1935 brought a big increase in building industry in Canada, contracts awarded totalling \$29,391,300 compared with \$19,855,500 in the same period of 1934. The increase was 48 per cent.

Dr. Frank G. Vizetelly, of New York, who has lived intimately with words for almost half a century as editor of the Funk and Wagnalls dictionaries, observed his 71st birthday hard at work compiling a new volume of 200,000 words.

The packing industry has by research developed about 140 by-products, mostly from parts of the animals that used to be considered waste.

YOUR HANDWRITING REVEALS YOUR CHARACTER!

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

Mrs. L. R. writes as follows: "I am a widow with two children, and have been corresponding with a man from the West. He wishes to marry me, and although I have never seen him, his letters are so pleasant that I find myself drawn to him. He is married, but has not lived with his wife for some years, and offers to get a divorce if I accept his offer of marriage. I feel that I should remarry, because I am still young, but I naturally don't want to make a mistake. My first marriage was very happy, and my husband left me a substantial sum of money. Any help you care to give me will be welcome."

I am sorry that I cannot be over-optimistic about your chances of making a really favourable marriage with this man, Mrs. R. He is not generous—he is, as a matter of fact, of rather a narrow point of view; not really broadminded.

He is likely to get very irritable, if not bad-tempered, and whilst a lot of us have this little trait at times, allied as it is in this case with narrowness of mind, it shows that this man is not easy to live with.

He is rather changeable, too. He will be inconsistent, not at all stable, temperamentally, but fickle in his moods. It would be difficult to understand him at times.

Another characteristic that stands out is this man's vanity. He expresses this in one of his letters to you when he remarks on the number of lady friends that he has had, and, whilst he is endeavouring to convey a subtle compliment to you, in that he prefers you to all the others, this also shows conceit. And his handwriting bears this out very clearly.

I mentioned that he is not very generous. I would go further and say that he is economical and cautious to the point of parsimony.

As regards yourself, your writing shows that you have a rather emotional nature, you are quick to feel joys and sorrows, and possess a marked capacity for affection. Yours is essentially a nature that needs company. There is nothing of the cold or aloof type about you. You are ardent, lovable, spontaneous—like lots of fun, and have a liking for being "on the go".

You are still young, and I certainly agree with you that marriage would be an excellent thing for you—provided that you get the right sort of partner. Your previous happy choice has given you a standard that it may not be easy to parallel. But I have no doubt that the opportunity will again arise. In the meantime, I am sorry that I cannot advise you to accept the man whose writing you sent to me, without, at least, taking an opportunity of checking up my summing up of his character.

Would you like an analysis of your character? And have you any friends whose real natures you would like to know? Send specimens of the writing you wish to be analysed, stating birthdate in each case, and enclose 10c coin for each specimen. Send with 3c stamped addressed envelope, to: Lawrence Hibbert, Graphologist, care of Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg, Man. Letters are confidential and replies will be sent as quickly as possible.

Would Make Gold Cheap

Polish Scientist With Secret Z-Ray Claims New Extraction Process

What would happen if Professor Dunikowsky, the Polish scientist, should prove his claim that by his secret Z-ray process he can extract from auriferous earth eight times more gold than is possible by the methods hitherto employed?

Authorities in Paris admit that it would mean the conversion of the precious metal into a base one, perhaps of no greater value than lead.

But the same authorities ridicule such a possibility, despite the report of M. Bonn, expert in chemistry to the Paris courts. After testing Dunikowsky's apparatus at San Remo, Italy, he says it is unquestionable that it permits the extraction of much larger quantities of gold than any other known process.

Maitre Jean Charles Legrande, the Paris lawyer, stated that he intends to demand a retrial of the case in which the Paris court sentenced Dunikowsky to two years' imprisonment for fraud.

Look over the hoes occasionally, and grease the blades if they are growing rusty. A rusty hoe is a poor tool.

Copper mining is Arizona's chief industry. 2093.

This Name* Means Extra Fast Relief From Pain

Get tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

An Aspirin tablet starts disintegrating as soon as it touches moisture. That means that Aspirin starts "taking hold" . . . eases even a bad headache, neuritis or rheumatic pain almost instantly. And Aspirin is safe. Doctors prescribe it. For Aspirin does not harm the heart.

Be sure to look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is made in Canada and all druggists have it.

Little Journeys In Science

GASOLINE

(By Gordon H. Guest, M.A.)

Gasoline consists of a mixture of liquid compounds known as hydrocarbons. The use of gasoline as a source of power in engines is due to the fact that the gasoline is easily changed to a vapour and that a mixture of gasoline vapour and air, when ignited, burns instantaneously, or, as commonly expressed, explodes. The mixture of gasoline vapour and air is led into the cylinder of the engine where it is ignited by an electric spark.

The "ethyl gasoline" which is now used so widely, is gasoline to which has been added a small amount of two colorless liquid compounds known as lead tetraethyl and ethylene bromide. The lead tetraethyl prevents the "knocking" of the engine when the engine is under high pressure; the reason for this is as yet not known with certainty. The use of the lead compound alone causes lead to be set free during the reaction, and as a result the ignition points of the spark plugs become clogged. When ethylene bromide is added, the lead combines with the bromine which is present in the bromide, producing the volatile lead bromide which escapes in the exhaust.

In former days kerosene was the most important product obtained from crude oil. To-day, however, gasoline is by far the most valuable of these products and hence science has put forth every effort to increase the yield. This is done by distilling kerosene and similar oils at high temperatures under pressure. This process is known as the "cracking" of oils. The average crude oil from the large producing areas of Texas and Oklahoma contains about 30% gasoline. Modern improvements in the cracking process have enabled oil refiners to increase the gasoline yield to 70% of the crude oil or higher, depending on the nature and quality of the gasoline which is desired.

Recent experiments have shown that the gas hydrogen under high pressure changes powdered coal suspended in hot oil into lubricating oils, gasoline, and similar products. When the supply of petroleum becomes exhausted this process may supply man with these products so necessary to our modern civilization.

New Machine Perfected

Can Determine Centre Of Gravity Of Human Body

A machine which can determine the centre of gravity of the human body has been designed and built in New South Wales at the Melbourne University.

The machine was described and demonstrated before the physiological section of the Science Congress in Melbourne by Prof. Osborne and Although the machine is very heavy, it is so sensitive that a weight of one-third of an ounce placed one foot from its centre will disturb the balance. Disturbance of the centre of gravity in certain diseases may be determined by the machine.

Aluminum finished by a new process is greatly increased in its reflecting properties.

The Yangtse Kiang river, in China, contains 7,000 miles of dikes.

Historic Chapel Reopened

Forlorn Corner Of Sheffield Cathedral Has Been Restored

South Yorkshiremen the world over will hear with interest of the reopening by Dr. Leonard Burrows, Bishop of Sheffield, of the historic Shrewsbury chapel within Sheffield cathedral.

It is more than four centuries since what was then the old parish church of the city of cutlery lost that portion of the building known as "Our Lady's Aisle and Her Chapel."

In the centuries which have since passed, the chapel has remained, until now, merely a forlorn corner of the church, and was noted only as a burial place of long-forgotten members of the family of which the Zaris of Shrewsbury were the head.

The chapel has now been suitably restored and decorated. The north choir aisle and the Rowley Hill chapel have likewise been restored. The organ is being moved to the west end of the cathedral and this will enable the chancel to return to the dimensions originally planned by its mediaeval builders.

A Queer Combination

Six Blind Musicians Will Play For Deaf Dancers

Six blind musicians in England can also thank the wireless for allowing them to form their own orchestra. By listening in to different broadcasts, they memorized various pieces by memory, being the only way in which they could learn the music, of course. Next month they are to play at a dance in Leeds Town Hall. The dancers will all be deaf mutes who have had to use their eyesight to learn the steps, not being able to hear their instructor. They are taught by watching the steps of couples who are normal. On the face of it this queer combination of dancers and musicians may appear pathetic. But is it not rather triumphant—that handicaps are not insurmountable? The musicians will not see the dancers, the dancers will not hear the musicians . . . but the spirit is there!

New Aid For Blind

"Electric Eye" Enables Them To Read Ordinary Print

An announcement says Prof. A. G. Goldman of the Soviet Ukraine had invented an "electric eye" by means of which the blind with their fingers would be able to read ordinary printed books.

An apparatus equipped with lenses, moves over print and projects images of letters onto a photo-electric cell, he explained. The cell changes the images into electric impulses which cause vibrations on a special desk designed for this purpose.

Istanbul Solves Problem

Pedestrians And Vehicles Have Been Assigned Different Streets

Pedestrians of Istanbul, Turkey, have been assigned streets for their exclusive use while automobiles and horse-drawn vehicles have been given sole rights on others. One-way streets also are being tried. Traffic lights were used for awhile and rejected. The city has a real traffic problem in the congestion of its narrow and winding lanes.

A horse's lifetime is usually figured at about 25 to 30 years, but English writers have mentioned horses that lived to be over 60.

Lazy Leaf Basking in the Sun!

—But it "gets its day's work done" THAT way — storing up fragrance and flavour for Ogden's Fine Cut. When you "roll your own" with this famous cigarette tobacco, you will realize how much selected, sun-ripened leaves do to make every puff more enjoyable. Of course you'll use the best papers — "Chanteclair" or "Vogue" — the choice of discriminating men who "roll their own".

WHAT TO DO ABOUT "Acid Indigestion"

A WAY THAT RELIEVES THE CAUSE IN A FEW MINUTES

Many people who think they have "weak stomachs" or "indigestion," doctors say, suffer in reality from nothing more serious than *acid stomach*. And this common ailment can usually be relieved now, in minutes.

All you do is take familiar Phillips' Milk of Magnesia after meals. This acts to almost immediately neutralize the stomach acidity that brings on your trouble. You feel like a new person!

Try this just once. Take either the familiar liquid "PHILLIPS", or the new Phillips' Milk of Magnesia Tablets. But watch out that you get the Genuine PHILLIPS' Milk of Magnesia. Made in Canada.

PHILLIPS' Milk of Magnesia

THE TENDERFOOT
By
GEORGE B. RODNEY
Author of "The Coronado Trail",
"The Canyon Trail", Etc.

CHAPTER V.—Continued

Even Dustin grinned at the thought of the old ranch-man, once the Nestor of Seco Valley, being searched for a gun in a murder case. Garcey was laughing frankly as he thrust a big hand into the side-pocket of Joe Carr's coat. But that grin suddenly froze on his face as he drew from the pocket a wadded mass of green-and-yellow silk. He seized it by one dirty corner and shook it out and all the watchers started back as a short heavy Derringer pistol clattered to the floor.

Garcey's eyes bulged and Crewe's face changed. Carr, grown suddenly old and grave, stared at the pistol as Garcey reached for it but Stone was too quick for him. He quickly retrieved the weapon and examined it carefully and a silence fell that Dustin broke.

"I reckon this clears me of all suspicion," he snarled. "When the Hour-glass gets to shootin' their own partners they're droppin' pretty damned low. . . ."

Garcey turned sharply on him: "You're cleared, Dustin," he said. "But I'm givin' you a word of advice. Say nothin' of this here till I tell you. If any word gets out, I'll know who told it. He'll have me to reckon with. Get me?"

Dustin looked at him queerly and a chilly feeling ran up his back. He did not fear many men but he had a most healthy regard for old Jim Garcey.

"Good Lord," he snapped: "I'm not interested in Hour-Glass killin' off Hour-Glass. It's rat eat rat as far as I'm concerned. I'll say not a word about it."

The door slammed behind him and Garcey turned to old Carr.

TIRED and IRRITABLE

DO you feel weak and nervous? Is your housework a burden? Take Lydia E. Pinkham's Vegetable Compound. Mrs. M. A. Kelly of Woodstock, New Brunswick, says, "I was weak and rundown. A neighbor brought me your Vegetable Compound. It helped me so much that I am taking it now as the change."

Get a bottle NOW. It may be just the medicine YOU need.

Try Lydia E. Pinkham's VEGETABLE COMPOUND

"Listen now, Joe. . . ." His voice had grown suddenly old and tired for he had been fond of Joe for more than a generation. "You got some explainin' to do, Joe. Where'd you git that Derringer?"

"I never had a Derringer in my life," said Carr dully. "I ain't got one now. . . ."

Garcey quietly "broke" the pistol. One barrel had been fired, in the other a loaded cartridge nested and the lower barrel was foul from the explosion. He extracted the empty shell and fitted to it the big lead bullet that Epps quietly handed him. It fitted. Still Carr stared at him. Then Stone took the pistol from Garcey's hand and examined it. Crew's face was a study. He could not disbelieve the evidence of his own eyes; yet . . . He knew old Joe Carr and loved him.

"I think we're barkin' at a knot, Sheriff," said Stone quietly.

Garcey turned on him. "When I need a tenderfoot to tell me my business, I'll call you," he said acidly. "What you got that's new?"

"A little bit of brains," said Stone. "You can see for yourself that the man's shot on the right side . . . Just above the liver. Every one in this room knows that he was standin' on Mr. Carr's right. Did Carr reach clear around the man and shoot right toward himself?"

Epps and Crewe both nodded and Garcey looked puzzled.

"Are you sure Carr was standin' as you say?" he asked.

"Absolutely certain."

"Here," said Epps quickly: "We can't wait till you solve this case before we treat the man. I want some one to help him over to my house. I'll take care of him till you can get a regular doctor."

"One minute . . ." Garcey turned to Carr. "Joe," he said gently: "God knows I don't like to arrest you but I've got to. The evidence is too strong against you. If you give me your word of honor not to make any break, I'll take you over to my house as a guest till we can find out what's to be done. If this man dies, it'll be a charge of murder I suppose. You say his name's Keene?"

"Yes. Gerald Keene," said Crewe.

"He and Joe own the Hour-Glass together. That's the best thing to do, Jim. You take care of Joe. I'll get out to the Hour-Glass. I'm afraid it'll take some explainin' to make Edith understand."

With Logan's help they got the wounded man over to Epp's house and a woman was secured to act as a nurse and Crewe drew Stone aside.

"You better stop here to-night, I reckon," he said. "What is it?"

He said sharply for Stone was tugging at his pocket.

"I was goin' to say that I'd better stay in here," said Stone. "I've got a clew I want to look into, Crewe. . . ."

He drew from his pocket the green-and-yellow bandanna. "You can't tell one Derringer from another," he said: "But wearing apparel is different. Did you ever know any man wear a damnable thing like this? It's got three bullet-holes in it so there's no doubt about what took place. The would-be murderer had the gun wrapped in this and he fired through it. That's why we didn't see any sparks. Did you ever see any one wearing a thing like this?"

Crewe shook his head. Things were moving too fast for him.

"I never did," he said. "Well. . . . I just got to get back to the Hour-Glass. Look out for young Keene and old Joe, will you, Stone?"

Stone promised and Crewe started the car down the street. The moment darkness hid the car, Stone hunted up Epps and almost by force dragged him into his office.

Neither man ever told what took place in that office but in a half-hour Stone emerged triumphant and headed down the street for the little office where Jameson held forth. That gentleman, bending over a form-case, was snatched to a stool and an evil-smelling mass of green-and-yellow silk was thrust under his nose.

"What's that smell like?" demanded Stone sharply.

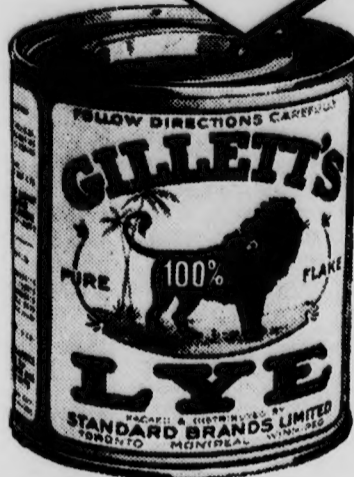

Jameson, who had been writing a hasty account of the shooting, sniffed and spat.

"Peyotl," he said. "Why?"

"That's what struck me," said

RUBBING AND SCRUBBING LEFT ME LIMP AS A RAG

UNTIL I USED

NOW—spots and stains wash off

Yes—Gillett's Pure Flake Lye actually washes dirt away without scrubbing—makes short work of cleaning jobs. Just use a solution of 1 teaspoonful dissolved in a quart of cold water. It cuts away grease, takes off

stubborn stains. Makes so many messy cleaning jobs easier—quicker. Order a tin from your grocer—today!

*Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—Send for the free Gillett's Lye Booklet. It shows you how this powerful cleanser and disinfectant takes the hard work out of house cleaning. Also gives complete directions for making soap, thorough cleansing and other uses on the farm. Address Standard Brands Ltd., Fraser Ave., & Liberty St., Toronto, Ontario.

GILLETT'S LYE EATS DIRT

Stone. "Can you possibly be mistaken?"

"Good Lord, no. It's peyotl all right. Where'd you get it?"

"Ever see any one wearing a thing like that?"

"I never did. . . . Look here, Stone. . . . what're you driving at?"

Stone told him in well-chosen words and few and Jameson took fire at the recital.

"It looks to me as though you've got a solid morsel to chew on," he said finally. "I only know one man who can be said to regularly use that infernal stuff. That's the man Peyotl Gregg out at the Broken Spur. I'll see if I can find him. They'd probably shoot you if you went out there. See me first thing in the mornin'. I may have news for you."

CHAPTER XVI.

Sam Dustin headed for the Broken Spur half drunk with liquor and success. Even in his most hopeful moments he could never have hoped that Peyotl Gregg, having killed Gerald Keene, would place the blame for that killing on Joe Carr. Joe, of all men!

"The only man who could have had a motive," he chuckled. "If Keene dies, Carr gets his half of the Hour-

Glass. I'll take it away from Carr and have the ranch and the mine too. . . . And the girl. . . . Wait!"

A sudden illuminating thought came to him and he slapped his leg hard. "By God," he said. "I've got it and I've got the girl. . . . But it's pretty hard on Peyotl. First of all I've got to find out if the man Keene will die."

He flung out of the car and almost leaped into the house. Spike Goddard was flung aside roughly as Dustin jerked the telephone from its hook.

"What're you callin' Doc Epps for?" demanded Dustin.

Dustin waved him into silence and Epps voice came tinnily across the wire. Goddard could hear it plainly.

"Oh. Dustin at the Broken Spur. Huh? Yes. . . . This is Doctor Epps. . . . What? . . . Oh. . . . I get you. . . . Yeah. . . . I know who you mean. I brought him over to my house. . . . Gerald Keene, of course. . . . The partner of old man Carr at the Hour-Glass. . . . You are interested, huh? Well, I'll tell you, Dustin. He died not ten minutes ago. . . ."

Epps' voiced sounded strained and uncertain but there was no mistaking the words. "The coroner'll be in to-morrow. It looks like a hemp neck-tie for old man Carr."

Spike Goddard heard it all and stood staring at his partner as he flung up the receiver.

"What the hell has happened, Sam?" he demanded.

He considered Dustin in silence while Dustin told him all that had occurred. Finally:

"Look out you don't trip," he said curtly. "There was a man once who held all thirteen trumps but lost the game. . . ."

"How could that be, you poor fool?" demanded Dustin.

For answer Spike grinned at him. "It was old-fashioned Whist," he said. "One man held all thirteen trumps. It was his partner's lead. He led an ace and when his partner trumped it he got mad and shot him. The jury said it was justifiable homicide. . . . Mind you haven't bit off too much to chew."

"You fool. . . ." Dustin grabbed him by the arm. "Don't you see it yet? Peyotl Gregg shot this man Keene and planted the pistol on old Joe Carr. . . . Joe, who inherits the Hour-glass by the death of Keene. We've got Carr's note and we alone know of old Kane's mine. . . ."

"Nobody knows Peyotl killed him," said Spike.

"I do. Old man Carr'll be held for the murder. He'll hang unless they find out about Peyotl. Don't you reckon Edith Carr'll marry me to get her father clear?"

(To Be Continued)

People of the United States eat only one-tenth of the country's big corn crop directly as food.

The human heart contracts about 86,000 times a day. 2093.

Gift For Museum

Worth over \$25,000, the Canadian National Museum at Ottawa will receive a mounted set of the now nearly extinct wood buffalo from Fort Smith, N.W.T., presented by Harry Snyder, Montreal and Chicago oil man, it was stated by Dr. George Goodwin, New York, assistant curator of mammals for the American Museum of Natural History, on his arrival from the north.

Farm Home Burned

The farm home of Mr Joe
Tabert, 4 miles west of Carstairs,
was totally destroyed by fire on
Saturday afternoon.

Nobody was in the house when
the fire broke out. Mr Tabert being
in the field and Mrs Tabert and
family having gone to Didsbury.
The fire was too far advanced when
discovered and it was impossible to
save any of the contents

Knox United Church Notes.

The Sunday School will have
charge of the Mother's Day service
on Sunday morning.

The service at the Knox United
Church on Sunday evening will be
conducted by Rev T J Stainton of
Innisfail. He will be assisted by
the Innisfail Male Quartette. The
Didsbury choir will visit Innisfail
where they will render the cantata
"Resurrection Light."

First Softball Game of Season

The first softball game of the sea-
son was played Monday night when
Didsbury Juniors beat Melvin in a
heavy-scoring game by 20-9.

Play was about even up to the
sixth inning, when Brusso with a
home-run and loaded bases, opened
up a batting spree for Didsbury.
Otto Folkmann also batted out a
home-run in the same inning. The
final score was Didsbury 20, Mel-
vin 9.

Krebs Brothers were the battery
for Melvin, and Holub, Berscht and
Tuggle the Didsbury battery

Compulsory Butter Grading.

The grading of dairy butter for
domestic consumption became com-
pulsory in the provinces of British
Columbia and Alberta on May 1st
The terms to describe the grades
as required by law must be 1st Grade,
2nd Grade, 3rd Grade and No Grade
The term used must give the correct
description of the quality of the
butter in accordance with the stan-
dards provided by law for different
grades

Burnside Notes.

Don't forget the W.I. picnic and
dance on the 24th of May.

We wonder why Earl goes north
so often these days.

Mr. Geo. Metz spent the weekend
with Calgary friends.

Messrs. Sam McAllister and Gus
Bittner were Sunday visitors at N.
Eckel's.

Mr. and Mrs. Chris Ehret spent
Sunday evening with Mr. and Mrs.
Neil Gill.

Mr. and Mrs. Lewis McCulloch of
Turner Valley are visiting relatives
in the district.

Mrs. Julia Riddell and Mr. Alec
Middleton of Calgary spent the
holiday with the former's sister,
Mrs. Kate Saunders.

Mr. and Mrs. Otto Bittner and
Stanley Coyne were Sunday dinner
visitors at the home of Mr. George
Metz.

Mr. Jim Tate spent a few days
with friends in the district when he
returned from Ontario recently, and
left again for his home near Oyen.

Mrs. Leah Doll and son Fred
arrived Saturday evening from
Kitwanga, B.C. and will visit her
daughter, Mrs. Sam Elliott.

Mountain View Notes

"Mother's Day" will be observed
at the Sunday School and Service
at the Mountain View Community
Hall at 10:30 a. m. Sunday, May
12th All are invited to attend.

Mountain View Social Credit
Group will hold a pie social in Com-
munity Hall on May 17th at which
Mr. Pryor will be guest speaker.
All interested in the movement are
heartily invited to attend this affair.

LOCAL & GENERAL

Jack Currie of Innisfail visited
his home here during the weekend

Miss Eileen Durrer is visiting
friends at Lacombe this week

Raymond Bellamy was a visitor to
Edmonton during the holiday week-
end.

Hugh Lee of Vulcan was renew-
ing acquaintances with his friends
here during the weekend.

Piano Tuning De Luxe—Delayed
by bad roads Gavin Spence and
W. H. Norton are now in town.
Leave orders at Pioneer Office.

Mr. and Mrs. S. G. Coultiss of
Turner Valley were the guests of
the McGhee family over the week-
end

Mrs. Dr. R. M. Oatway of Stony
Plain, Alta. spent the weekend
with her brother and sister-in-law,
Mr. and Mrs. W. W. Gillrie

Mr. and Mrs. Tom Smith of
Toronto, cousins of Mrs. A. G.
Studer, are visiting the Studer home
on their return trip from California

One of the flagpoles at the curb
on Main Street on Monday was
broken by a car and the driver did
not have the courtesy to place the
flag out of the way

Mary and Sammy Boorman went
to Calgary on Tuesday to take part
in the musical festival. Mary was
successful in taking second place in
the piano class under 11 years of
age.

The golf links were very popular
last Sunday and we are informed
that there were 14 people on one
fairway at one time. Improvements
are being made at the links and all
the greens will be in good shape by
the weekend.

The proceeds of the play, "Here
Comes Charlie," given at Carstairs,
Madden and Cremona, by Westcott
Musical and Literary Club, totalled
\$49.12. It is to be deposited in the
bank as the start of a building fund.
It is hoped that in the near future
they will have a more suitable
place for their literary meeting.

On Monday evening next at 8:30
p.m. in the Knox United Church
there will be a meeting of the young
people of Didsbury to hear a team
representing the C. C. Y. M. (Chris-
tian Commonwealth Youth Move-
ment) of Canada. All young people
of both sexes and all denominations
welcome. You will be interested.
Come and see.

Mrs. Russell Berscht entertained
a number of ladies at a Silver
Jubilee party on Saturday evening.
The guests were attired in the style
of twenty-five years ago. A buffet
supper was served and a number of
snapshots were taken. The ladies
had to retire early, they say the
clothes were not conducive to com-
fort after supper.

Committee to Study Problem of Weeds

For the purpose of studying the
problem of weeds in Canada an
Associate Committee on Weed Con-
trol, the personnel of which are
members of the Dominion depart-
ment of Agriculture, the National
Research Council and the Provincial
departments of agriculture and the
agricultural colleges, has been set up.

Weeds on farms throughout Cana-
da are causing an annual loss to
farmers that represents a staggering
monetary total. It is estimated that
the loss caused by weeds to the
grain crops alone aggregates well
over \$100,000,000 a year, and the
unpleasant truth is that the problem
each year is becoming more serious.
